

Pete Stanley

Toronto, ON
Email: msg.pete.stanley@gmail.com

I bring a user-first approach to deliver secure, scalable, cloud-native solutions empowering teams to be their best. I'm always asking myself how I can bring the most value and impact to the business. My vocational enthusiasm for technology is what drives me in my journey towards "putting a dent in the universe".

Skills

- AWS, Azure.
- Bash, PowerShell, Python.
- HTML, CSS, JavaScript, Php.
- SQL, RDS, NoSQL.
- Git.
- IaC/CaC.
- CICD automation.
- Docker, virtualization.
- Proxy, Load Balancing, WAF.
- LAMP, Nginx, IIS.
- Agile delivery, Jira, Confluence.
- Project Management.
- Change Management.
- Highly available solutions architecture.
- Logging, Observability, Incident Response, escalation.
- Identity Management.
- CyberSec, Prisma Cloud, Tenable, Defender.
- Patch Management.
- Nexus, SonarQube.

Work Experience

2022 - Now | DevOps Engineer | Movember

- Established foundational DevSecOps team, agile ways-of-working, framework, strategic roadmap, & key metrics.
- Identified deficiencies in delivery processes & built automation to address them. Built self-service tooling allowing developers to provision infrastructure following best practices.
- Introduced app/infrastructure governance & compliance to SDLC including CSPM/CWPP.
- Integrated end-to-end quality & security testing into development practices.
- Transitioned applications to serverless architecture with deployment via IaC/GitOps.

2020 - 2022 | Senior Systems Engineer | Movember

- Contributed to successful delivery of ISO 27001:2013 certification.
- Served as key escalation point in problem/incident management. Provided mentorship & training to wider team.
- Supported legacy stacks, established documentation, and led hardening initiatives.
- Wrote business cases to execute initiatives including reporting to Executive Leadership.
- Participation in cross-functional DevSecOps & Solutions Architecture COPs.
- Built bespoke applications to meet internal business needs - HR, Finance, TechOps.
- Creation of integrations between independent systems using RESTful APIs.

2016 - 2020 | Systems Engineer | Movember

- Execution of global TechOps modernization strategy - Network infrastructure re-imagining, SSO, process automation, MDM, enablement of remote working, DR/BCP.
- Led numerous initiatives to mature team processes resulting in faster delivery, greater standards, and improved reporting capabilities.
- Maintained solid relationships with suppliers ensuring we maintain best value for dollar.
- Implementation of new systems and services per business requirements.

2015 - 2016 | Systems Administrator | Bolton College

- Built/maintained highly-available systems and infrastructure to support applications, databases and in-house tooling.
- Designed and built a VOD + live streaming platform.

2013 - 2015 | IT Technician | Bolton College

- 1st & 2nd line helpdesk support to the College's 13,000 Staff and Students.
- Management of VMware private cloud and VDI, storage and backup systems.
- Implementation of device management platforms.

Education

2023 **Certificate in DevOps** | York University School of Continuing Studies

2021 **AWS Certified Solutions Architect - Associate (SAA-C02)** | Pearson View/ AWS

AWS Certified SysOps Administrator - Associate (SOA-C02) | Pearson View/ AWS

Microsoft Certified Azure Fundamentals (AZ-900) | Pearson View/ Microsoft

2018 **Cisco Certified Meraki Network Operator** | Cisco

2013 - 2015 **Advanced Level Apprenticeship in IT, Software, Web & Telecoms** | Bolton College

2012 - 2015 **BTEC Level 3 Diploma for IT and Telecoms Professionals** | Bolton College
